Side panels

The panels are available to be attached to FIAMMA CaravanStore and CaravanStore XL, which is usually installed in a caravan.

The optimum height for which it is available is 245 cm, there being a reasonable margin in both directions and the anchors are adjustable in height.

They are made of polyester PVA RipStop, fully breathable, very light and resistant.

The grey colors scheme fits perfectly with Caravanstore tones.

The panels are sold separately providing great flexibility in the combinations.

The sides have a wide window with the option to include curtains.

The frame (roof pole) is made of anodized aluminum.

Font panels

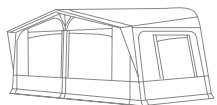

The front is configured for the different Caravanstore and has in all cases a roller door, with zip and one/two windows also with option to fit curtains.

The front and the side are attached to cotton tapes, to the legs of the canopy itself. In this way we gain in lightness and flexibility. Also available in an adaptable version to F35 canopies in all its dimensions, matching all its specifications.

Acrylic Awning

It is manufactured with acrylic materials. That offers the solidity and resistance of long-lasting awnings. The attention to detail and a successful design make it an excellent awning for camping lovers.

The front is divided into two removable panels and consists of two/four fixed windows and a door on each side.

Each side panel is removable and has a door and a window with mosquito net on both sides.

The flaps will be collected on the inside of the awning and the pegging on the outside.

Available in three versions: standard in 250 cm depth, with extra space in 300 cm and also in 350 cm. It is an attractive awning, with a new and refined design and an elegant combination of colors.

The front consists of 4/6 panels, all removable and interchangeable, 3/4 of them consist of fixed windows and smooth design, the other/s has a sliding door to any position thus offering all the possibilities of transformation.

Each side is removable and has a door and a folding window with mosquito net. In the 350 cm model we add a fixed window.

This model can be completely closed, since it has covers on the windows. It can also be used as a sunshade and, optionally, the panels can be installed as front and side balconies.

Optional Accessories:

• Fix-On

• Verandah bars

• Fibreglass frame for Stela 250 and 300

• Front sun canopy

• Roof liner (velum)

• Annexe Luxe or Storage

• UNI storm straps

CARAVAN

New concept

Mint^{250/270}

Available in two versions: standard with a depth of 250 cm and with an extra space of 270 cm.

It is an innovative awning that combines a very robust PVC polyester roof with PVA polyester front and side panels: Maximum resistance without sacrificing the comfort and breathability of PVA:

The front panel is made up of 2/3 removable and interchangeable panels.

One of them consists of fixed windows, the other has a door and a fixed window.

Each side is removable and interchangeable, and has a door and a folding window with a mosquito net.

This model can be completely closed as it has covers on the windows.

It can also be used as a sunshade awning and can optionally be enabled as a front and side balcony

PVC Winter awning

250

FRAME + WINTER KIT (Optional)

Strong and compact winter awning, with reinforced structure and double apex roof. Of standard dimensions and for that reason only adaptable to caravans with the suitable dimensions (+/- 265 cm) of straight guide.

It is adaptable to any caravan because all the anchors are adjustable in height. The fixation of the sides to the caravan is made of rubber-foam that can be welded to any surface and reinforced by side legs.

A new ventilation screen is incorporated in the side panel. The front consists of a large fixed window. Each side has a door. The whole set is designed to ease a quick assembly and give an optimal service in the space-functionality relationship.

Color scheme:

Optional accesories:

• Roof liner (velum)

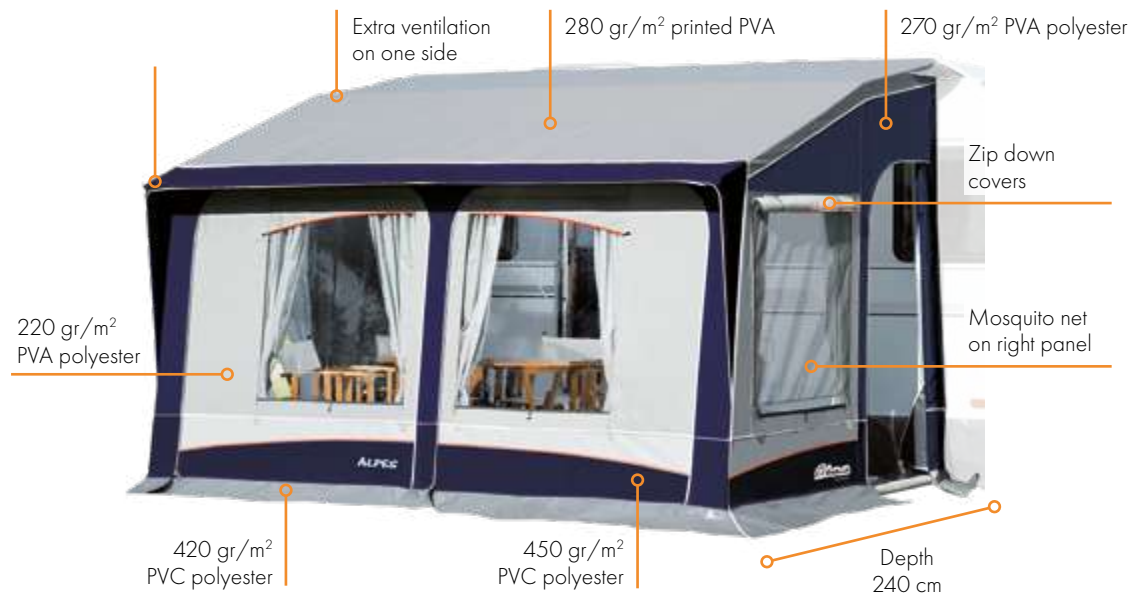

• Optional winter kit

• Fix-On

CARAVAN

AlpesClassic

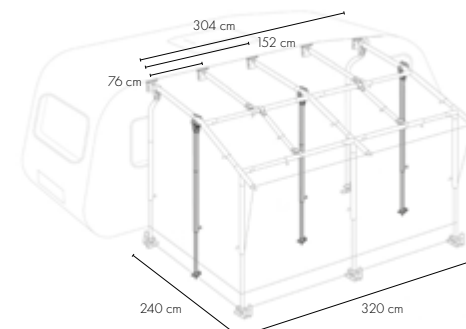

This awning has a roof with a double apex and reinforced seams. It is very strong and with a harmonious design. This is a universal awning and may be adapted to most types of caravan, since the fixing system are adjustable in height. The fixing system to the caravan consists of foam filled pads and Fix-On system adaptable to any surface and it is reinforce with side legs.

The only requirement is that your caravan has enough straight awning channel for the correct fitting of the porch. The winter reinforcement kit (optional) is recommended when the awning is used in areas with snow and rough weather.

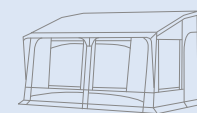

The front panel has two large fixed windows. It may be removed and may also be used as a verandah. Each side panel has a door and a window (on the right panel it may be rolled up and has a mosquito net).

THETFORD

INACA offers a wide range of awnings. Each of them has different performance qualities to satisfy every caravanner's specific needs. Therefore, it is very important to choose an awning that suits your needs. Do not hesitate to ask your distributors for advice. Their professional assessment will help you with your choice.

Which is the most suitable awning for your caravan?

When buying your awning, our distributors will need to know the brand, model, and year of your caravan. If you are unsure about any of these facts, INACA offers you a quick and efficient guide classifying the awning's size according to the perimeter of each caravan.

For instance:

If your caravan has a perimeter of 956 cm (measurement from A to B), the appropriate awning for you is V-950.

Some important suggestions

Always pay special attention at measuring the perimeter of your caravan; the correct selection of the size you require is a determinant factor for the proper erection of your awning. According to the different sizes the distribution of the front panel may vary. Pay attention at the diagrams in order to avoid misunderstandings. Never pack your awning when wet. Never clean your awning with products that may damage the materials. When you use your PVC awning for the first time under rainy conditions, it is possible that the seams may leak initially. The problem will disappear when the stitching has swollen into place over the following days use.
